

USHAS

➤ USHAŞ in the COVID-19 Pandemic

- In our country, prices of protective materials, where pandemic started, increased speculatively compared to the pre-epidemic period. Public, university hospitals and private hospitals were having difficulties accessing mask and protective equipment. During this period, Ushas was assigned to the task and the supply of protective materials was realized through our company for approximately 2 months.

During the period when USHAŞ served;

As a result of contracts with manufacturers of surgical masks and other protective materials, high market prices have been brought under control.

- The daily supply of surgical masks, which reached our company at the start of the pandemic, was increased to 25 million units per day by April 20, 2020; established the supply, distribution and logistics network and procurement processes were planned and shipped and managed on a daily basis.
- By coordinating with fabric suppliers, raw material prices were kept under control.
- In exchange for fabric supply, especially fabric and production contracts,
 - ✓ alternative production sources activated.
 - ✓ employment has been created in the garment industry, which is in a difficult situation due to the epidemic.

➤ USHAŞ in the COVID-19 Pandemic

- During this period, USHAŞ has delivered and distributed protective materials to Public, University and Private Hospitals in general;
 - ✓ 3 Layer Surgical Mask 361.095.980 pcs
 - ✓ FFP2 / N95 Mask 13.304.668 pcs
 - ✓ Protective Coverall 6,848,068 pcs
 - ✓ Protective Glasses 1.854.140 pcs
 - ✓ Apron 783,048 pcs
 - ✓ Examination Gloves 104,263,050 pcs

delivery and distribution of the material has been realized.

- USHAŞ played an important role in the supply of vital drugs in the treatment of COVID-19.
- Ushas supported the production and sales and marketing of domestic and national COVID-19 diagnostic kit (Bioexene) and respiratory device (Biovent) during the pandemic process.
- The role of Ushas as a supplier of personal protective equipment (PPEs) in the fight against Covid-19, the success of its rapid supply and distribution network, its contribution to production growth and prices decline, and its support for the financing, production and export of domestic respiratory device and diagnostic kit have been identified by UNDP as a role model for developing countries.
- In this context, a cooperation protocol has been signed with UNDP to develop the capacity of Personal Protective Equipment production in developing countries and to share experience.
